## Preferred Drug List

The MemberHealth Preferred Drug List is designed to provide you with the most clinically appropriate medications. By asking your doctor to prescribe a generic or preferred brand whenever possible, you are taking an active role in your health care and making a smart choice to receive the best prescription drugs at the most affordable price. Generic medications (bolded & italicized) offer the greatest value and should be used whenever appropriate. Generic and preferred brand medications are listed in select therapeutic categories and not meant to be all-inclusive.

Take this Preferred Drug List with you when you go to the doctor. Ask your doctor or pharmacist if a generic or preferred brand is right for you.

### Please note:

- Your prescription benefit plan may not cover certain drugs or categories of drugs, regardless of their appearance in this document.
- MemberHealth may contact your doctor to request consideration of a preferred or generic drug in place of your original prescription.
